GEA is one of the world's largest suppliers of systems and components to the food, beverage and pharmaceutical industries. The international technology group, founded in 1881, focuses on machinery and plants, as well as advanced process technology, components and comprehensive services.

With more than 18,000 employees, GEA generated revenues of about EUR 5.5 billion in more than 150 countries in the 2025 financial year.

All figures relate to the financial year 2025 or 2024 for the previous year.

What  
drives us.

Our purpose

**Engineering  
for a better  
world.**

Our vision

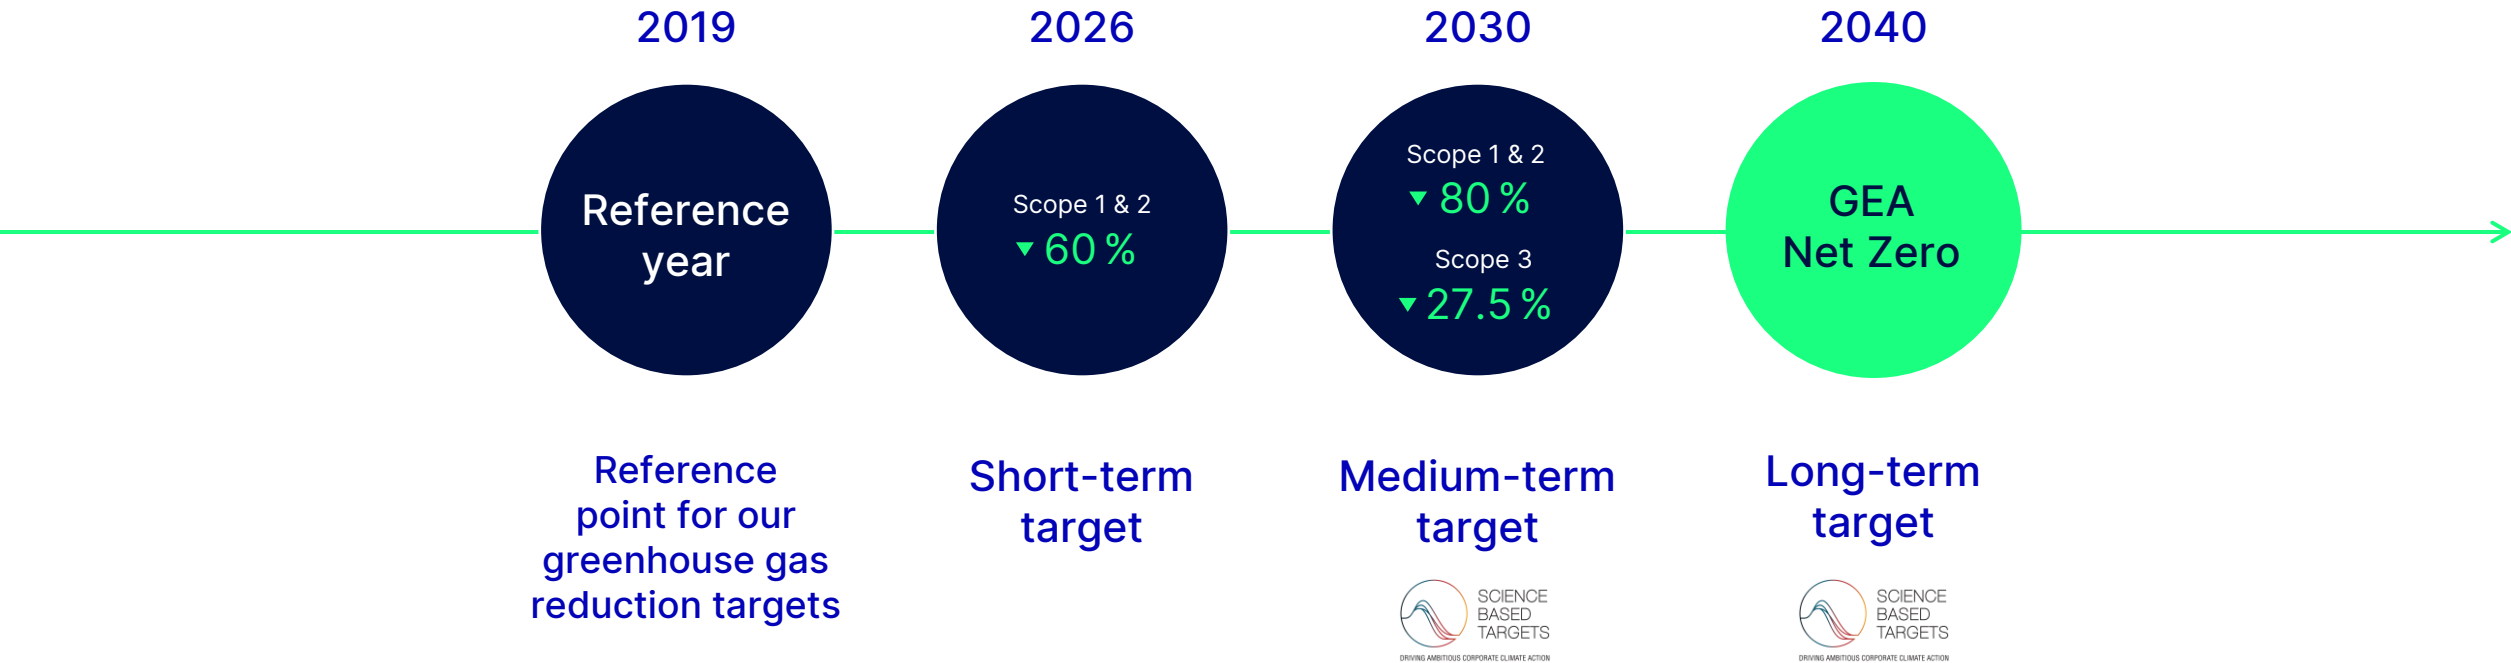

**We safeguard future  
generations by providing  
sustainable solutions  
for the nutrition and  
pharmaceutical industries.**

# Our strategy

**MISSION 30**  
GROWTH. VALUE. IMPACT.

# Our climate targets

GHG Protocol:

- **Scope 1** covers all direct greenhouse gas emissions in our own business activities, such as those from primary fuel sources used directly at company sites. Examples include natural gas, heating oil, gasoline and diesel. This also includes emissions from refrigerant leakages and the combustion engine vehicle fleet.
- **Scope 2** covers the indirect greenhouse gas emissions in our own business activities that result from the generation of purchased energy. The CO<sub>2</sub> emissions are caused by the consumption of secondary energy sources, such as electricity, district heating, steam or cooling energy in buildings and electric vehicles.
- **Scope 3** covers other indirect greenhouse gas emissions in the upstream and downstream value chain that are primarily associated with the company's activities. Scope 3 emissions are split into 15 categories, for example, the consumption of energy in the use phase of our machines and systems, the procurement of raw materials and semi-finished products, our business travels and employee commuting.

# Our sustainability approach

## IMPACT.

CONTRIBUTION

### Responsible Innovation

### Resilient Operations & Communities

### Thriving Employees

TARGETS

- Reduce **Scope 3** greenhouse gas emissions by **27.5%** by 2030
- **125 Mt CO<sub>2</sub>e emissions** saved along the value chain by 2030
- **All GEA solutions** will be offered **with the option of zero freshwater-use** by 2030
- **All new GEA solutions** will be **circular-ready** as of 2030

- Reduce **Scope 1 & Scope 2** greenhouse gas emissions by **60%** by 2026 and **80%** by 2030
- Pathway towards **Zero Impact Operations**: no negative impacts on waste, water, energy, biodiversity & OHS
- **100% of A-suppliers** will meet the **GEA sustainability criteria** by 2030 (preferred suppliers by 2026)
- **GEA Foundation** to strategically and effectively deliver on our commitment to donate 1% of net profit annually

- **80% favorable rating** of Employee Survey Engagement dimension by 2030
- **25% female** representation in **top and middle management** positions (L1-L5) and **30% in leadership development program** by 2030
- Broadening talent pools to include **more diverse target groups**
- Fair and performance-oriented pay commitment **addressing pay gaps** worldwide

## NET ZERO 2040

# Add Better solutions help customers produce more sustainably

# Key trends

Important global megatrends are propelling our technologies & underlying markets

**Growing world population**

**Food safety & quality**

**Essential & affordable medicines**

**Urbanization**

**Growing middle class**

# Our applications put consumers in touch with GEA every day

## Food

---

**Every 4<sup>th</sup> package of spaghetti** is processed with GEA technology

**Every 5<sup>th</sup> cookie** is made with GEA technology

**Every 3<sup>rd</sup> chicken nugget** is produced using GEA technology

## Beverage

---

**Every 2<sup>nd</sup> liter of beer** is brewed with the aid of systems and process solutions from GEA

**One quarter of processed milk** comes from GEA production systems

**Every 3<sup>rd</sup> process line** for instant coffee was installed by GEA

## Pharma

---

**Every 4<sup>th</sup> liter of human blood** for making plasma-derived products is processed using GEA equipment

**Every 2<sup>nd</sup> pharma separator** is made by GEA

**Every 2<sup>nd</sup> tablet to treat cancer** is made on GEA equipment

# GEA Service

We deliver digitally-enabled service solutions for the entire life cycle of plants and equipment, helping customers achieve their goals: increased availability, productivity and sustainability.

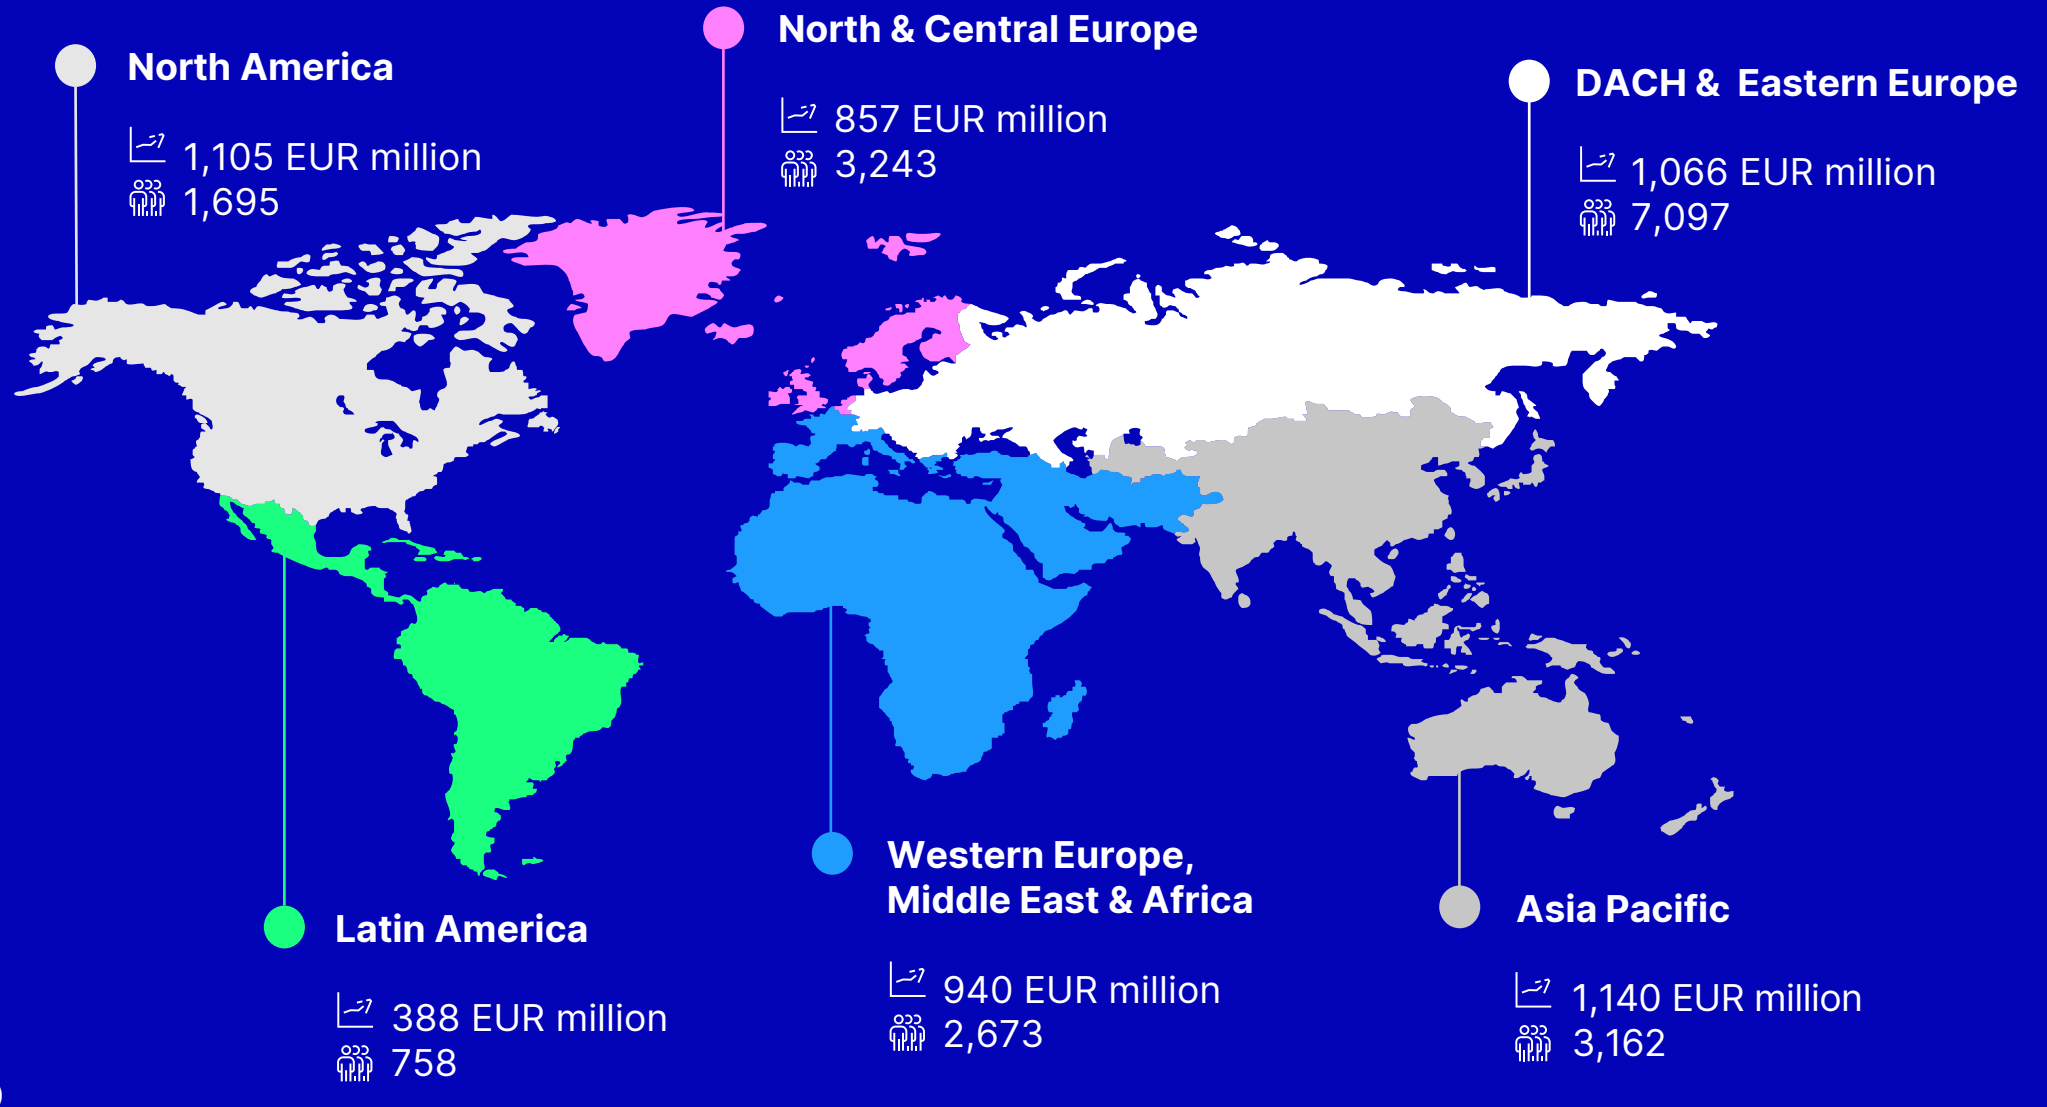

AVAILABILITY  
PRODUCTIVITY  
SUSTAINABILITY

Enabled by digitalization.

# OUR DIVISIONS

# Nutrition Plant Engineering Division

Engineering excellence for efficient food and beverage production

**Liquid, Fermentation & Filling . Powder & Thermal Separation . Heating & Cooling . Automation & Digital Solutions**

Nutrition Plant Engineering delivers integrated processing equipment and complete plants for the dairy, food, new food, beverage, pharmaceutical, chemical, and home and personal care industries. The portfolio spans brewing systems, liquid processing, aseptic and non-aseptic filling & packaging, concentration, fermentation, crystallization, purification, drying, powder handling & packaging, systems for carbon capture and emission control as well as advanced heating and cooling technologies.

# Pure Flow Processing Division

Innovate components and systems for excellence in resource-efficient production

## Separators . Homogenizers . Valves & Pumps . Compressors

The Pure Flow Processing division combines all process engineering components and machinery from GEA for resource efficient production processes worldwide. These technologies are at the heart of industrial applications and ensure the efficient, safe processing of raw materials and products. Powerful automation, digital and service offerings support planning, operation and optimization. This extensive expertise in production, heating and refrigeration technology enables resource-oriented, energy-saving solutions and makes an important contribution to CO<sub>2</sub> reduction and a cleaner environment.

# Pharma & Food Applications Division

Highly efficient and reliable production technologies for the pharmaceutical and food industries

**Pharma & Healthcare . Food Processing . Slicing & Packaging . Food Extrusion . Bakery**

Pharma & Food Applications delivers equipment and complete plants for processing solid dosage forms and freeze-drying technology for liquid products. For food processing, GEA offers solutions for the preparation, marination and further processing of meat, poultry, seafood and plant-based products, as well as processing lines for pasta, baked goods, snacks, breakfast cereals, confectionery and pet food, and equipment for food slicing and packaging.

# Farm Technologies Division

100 years of dairy farm innovation

## Dairy Farming: Milking . Feeding . Manure . Digital Herd Management . Hygiene & Service

Farm Technologies offers integrated solutions for professional and resource-efficient high-quality milk production and livestock farming. This includes automatic milking and feeding systems, conventional milking solutions and digital herd management tools as well as GEA manure management solutions. GEA's global farming dealer network provides full-service including a wide range of GEA hygiene products and chemicals to promote optimum cow udder health and superior milk quality.
