

THE NEXT STEP IN SMART FARMING

DairyNet®

Herd and farm management

EXPERIENCE NEW MOBILITY

Manage herd and farm on the go, whether you're in the barn, the pasture or out and about.

ACHIEVE YOUR GOALS

With GEA's herd and farm management you are always front and center.

Say yes to next generation Smart Farming! GEA's DairyNet Herd and Farm Management is a game changer and delivers the exact information overview you need for daily monitoring and decision-making in your automated milking operations. Simplify your life and manage cows, herd and operational tasks with top accuracy.

INTUITIVE DECISION-MAKING

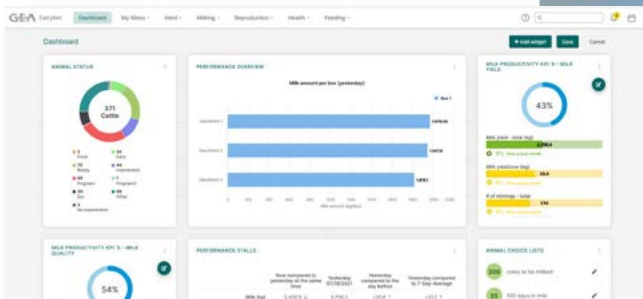

With targeted analysis tools, evaluate, plan and document with ease.

EFFICIENT PLANNING

Analyze milking operations proactively, organize animal procedures with just a few clicks.

No matter how your day starts, the dashboard always keeps you up to date. With the calendar function you see all upcoming events at a glance. This gives you planning reliability and helps you organize your team.

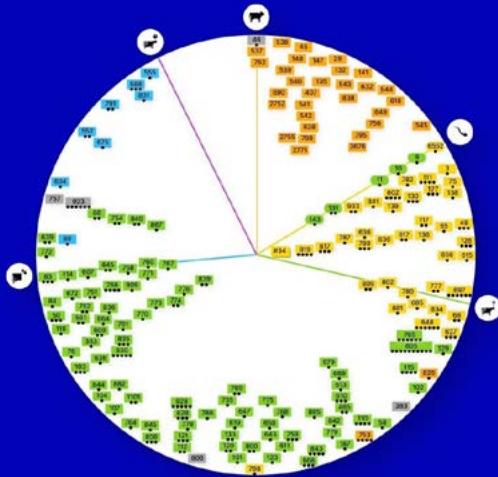

PRECISION TIMING

Carry out procedures punctually, never forget a task thanks to dashboard and calendar.

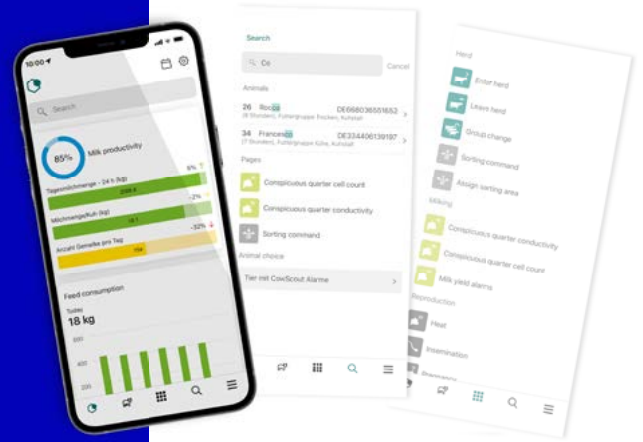

SECURE DATA ALWAYS AT HAND

Feedback functions help you recognize trends, optimize strategies and secure the success of your operation.

Unparalleled perspectives on herd performance, milking results or reproduction allow you to recognize trends and optimize strategies. Take your dairy farm to the next level!

GEA's DairyNet Herd and Farm Management is available for GEA's automated milking systems DairyRobot R9500 and DairyProQ.

The intuitive design of the DairyNet app puts functions for daily tasks directly at your fingertips. Thanks to close collaboration with farmers, its usability has been continuously optimized. Get on board and experience how easy it is to operate!

Local server solutions secure your valuable database and assure unlimited availability.
